

Item description/product images

Description

Material:

Outer jacket stainless steel.

Cage stainless steel.

Balls stainless steel.

Note:

The linear ball bearings correspond to series 3 of ISO 10285. With double-sided seals and a stainless steel cage. The bearing is secured with DIN 471/472 circlips.

Recommended tolerances:

Shaft: h6

Housing: H7

Linear ball bearings with double-sided seals should be greased before installation.

The specified load ratings apply with the use of hardened and ground shafts.
