

Item description/product images

**Description****Material:**

Polyamide PA6.

Version:

black.

Note:

Connecting elements for holding and fixating energy chains or a corrugated pipes.

Connecting elements are used where energy chains/corrugated pipes are to be held.

Temperature range:

-45 °C to +105 °C (briefly up to +150 °C).

Assembly:

The connection elements can be opened and closed tool-free via a plastic latch. The inner jaws consist of two identical half shells that are fitted on the energy chain via hole-pin connections. The jaws fitted around the energy chain are inserted into the connection element and enable the energy chain to be held securely by means of the internal profiling.
