

Item description/product images

Description

Product description:

Our C-rails are the ideal solution for the secure and flexible fastening of components in various industrial and commercial applications. They are characterised by their robust design and versatility, making them ideal for assembly and fastening projects.

Material:

Steel.

Version:

galvanised.

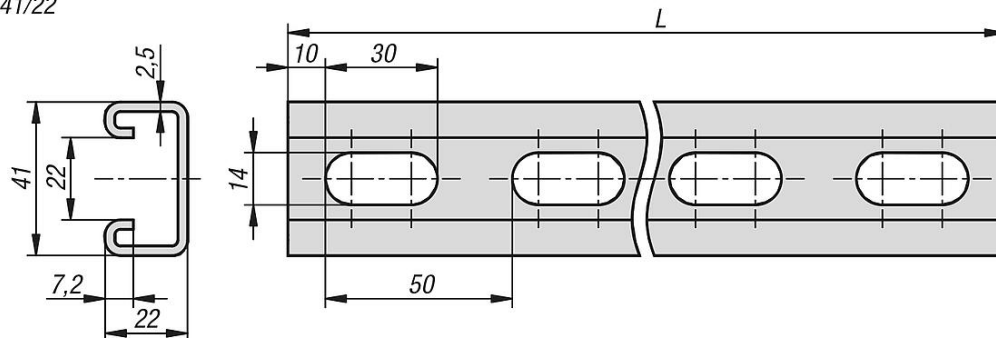

Note:

The mounting rails provide an excellent basis for the realisation of complex constructions. They enable the creation of safe horizontal and vertical installations. They serve as a basis for the secure fastening of pipes, electrical installations or other components in machine construction, building technology or electrical systems.

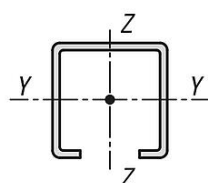

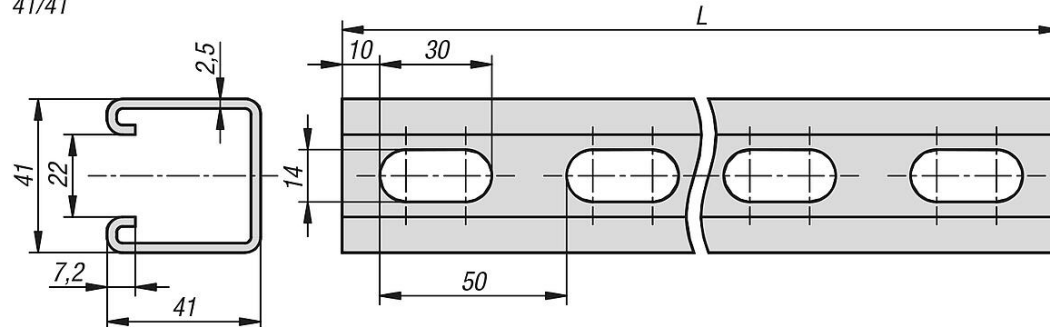

The rail lip is knurled so that it can also support vertical loads in conjunction with the corresponding accessories.
