

Item description/product images

Description

Product description:

The piano hinge with double joint was developed for complex opening geometries. The double-joint kinematics (two parallel axes of rotation), ensure doors or hatches can be guided around protruding edges or seals without jamming.

Material:

Stainless steel or aluminium body.
Pin stainless steel 1.4301.

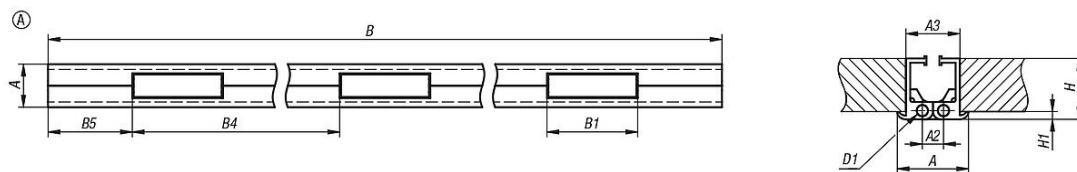

Version:

Stainless steel bright.
Aluminium, transparent anodised.

Note:

The opening angle is 180°.
Seals must be ordered separately.
The hinges have no holes.

Drawings

Overview of items

Piano hinges, aluminium, with double joint
