09141 Ferromagnet discs, steel, round, self-adhesive

Item description/product images

Description

Product description:
These ferromagnet discs are fitted to non-magnetic materials. They provide a surface to which magnets are attracted, ensuring that the magnets remain securely attached by various applications.

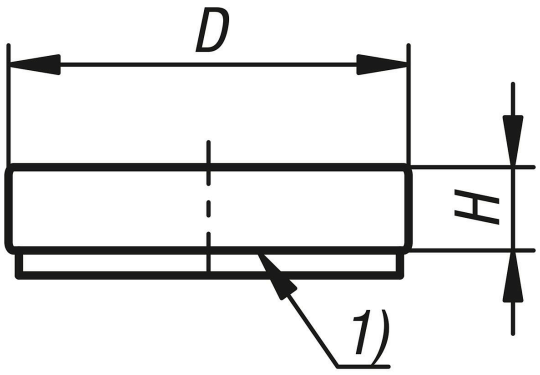

Material:
Steel.

Version:
Painted white.
Galvanised magnetic face.

Note:
The self-adhesive material is polyethylene foam, making it highly tear-resistant with strong adhesion.
The surface must be thoroughly cleaned to remove any dust and dirt before application.

Drawing reference:
1) magnetic face
